WELCOME

Thank you for your interest in Suffolk New College, we are delighted you are considering us for your next steps in further or higher education.

So why would you study at Suffolk New College? We have an excellent track record with our learners going on to higher education, jobs, or apprenticeships.

Since 2020 we have become a multi-campus college offering first-class training facilities in Ipswich, Suffolk Rural at Otley, and at On the Coast in both Leiston and Halesworth. In September 2021 we

opened a new Campus, a state-of-the-art £2.4m purpose built facility offering digital technology courses, which has proven to be popular. Work is underway to implement our plan to build a Health Science Campus in Ipswich, opening in 2023. By the time you begin your studies in 2023, a new Net Zero Skills Centre will also be open, with courses underway to address much needed skills in local industries working towards meeting their net zero targets.

We pride ourselves on the exceptional facilities we have on offer, where learners

can practice their new-found skills including; a working farm at Rural, our first-class Chefs' Whites training restaurant, hair salons and a spa, IT, motor vehicle and construction workshops, an Animal Centre at Rural and much more.

Our team of dedicated teaching and support staff have a wide range of knowledge and experience to assist learners' learning with links to many local businesses in industry who support the college. Whether you wish to either; begin your learning journey, progress to the next level, boost your employability skills, or

study on an apprenticeship, our staff are here to advise you.

There are over 250 courses to choose from, so enjoy browsing our prospectus to discover which pathway and course is the best for you.

If you choose to study with us, we look forward to supporting you grow as an individual and make friends for life, whilst gaining the skills you need to have the career that you desire.

Viv Gillespie
Principal of Suffolk New College

ENTRY CRITERIA

ENTRY LEVEL

WHAT IS IT?

Courses designed for people with little or no experience or qualifications. They're a great way to develop skills and build your confidence.

CRITERIA

Entry will be determined by interview. Applicants will need to be motivated and demonstrate a responsible attitude.

LEVEL 1

WHAT IS IT?

Ideal if you do not have the grades for a level 2 course or need to improve your English, maths or IT.

CRITERIA

Two GCSEs at Grade 1 including maths and/or English, or demonstrate the ability to work towards Level 1 in maths and English in an assessment.

LEVEL 2

WHAT IS IT?

Most employers use this as their minimum entry requirement. Some experience may be required in the subject. Progression to Level 3.

CRITERIA

Three GCSEs at Grade 3 including maths and/or English, or a Level 1 qualification plus maths and/or English at Level 1.

LEVEL 3

WHAT IS IT?

For people wanting to progress on to university or supervising and training others. A qualification or experience in the subject is usually required.

CRITERIA

Five GCSEs at Grade 4 or above including maths and/or English, or a Level 2 qualification plus maths and/or English at Grade 4 or above.

Some courses will
require GCSE Science,
please check the full
course details on
our website

GAME

GOOD AT MATHS + ENGLISH

Any learner who has not yet achieved a grade 4 or above in their GCSE English and/or maths will study English and/or maths in their study programme with the College.

We have a great rate of helping people achieve pass rates through their time with us.

College study programmes consist of English, maths, a vocational course and work experience.

Attendance at English and maths is monitored by progress and subject tutors.

Progression onto the next level of course will take into account your attendance at all your study programme lessons.

The College English and maths teams will support you throughout the year by:

- Helping to break down any barriers that there may be surrounding your English and maths development;
- Making sure that you have access to personalised resources, where needed, to help your learning and progression;
- Making sure you have examination concessions (such as extra time) if you qualify for them;
- Directing you, if needed, to study skill support.

WHY VOCATIONAL?

Vocational education offers individuals the opportunity to learn a trade or new skill via a variety of exciting full time programmes and apprenticeships.

Whilst seen by many as an alternative to A levels, the qualification you obtain (particularly at level three) are equivalent to three A level grades.

Courses tend to offer a mixture of work experience, hands-on training and classroom based activities that in most cases can lead to further study at college or university, a route straight into employment or an apprenticeship.

Many of our learners choose this pathway as it helps them learn through doing and mixes time in the classroom with real life experiences.

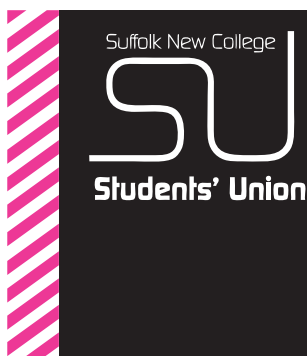

APPLICATION PROCESS

The application process is simple and easy. Firstly, take a look at our prospectus or check out our website www.suffolk.ac.uk and find a course that suits you.

You can then apply for your chosen course. After this, you will be invited to take part in an experience day, so you can come and have a look around, meet tutors and get a feel for what we do and how we do it.

You will be able to check your application status at any time on our application portal.

Then it's a question of enrolling, showing your results to a member of staff to add to our system and once everything has been processed, we will send you a start date and your time with us will begin.....

STUDENT VOICE

Our Student Voice provides a forum for all learners to feed back their opinions about things at Suffolk New College.

Course representatives regularly meet to discuss matters regarding their course and learners are also encouraged to attend Student Parliament where college-wide suggestions can be discussed.

The Students' Union consists of a President and their executive committee of course reps.

1

OUR LOCATION

Situated in the education quarter of the county town of Suffolk, a mere stones throw away from the picturesque waterfront, the main campus of Suffolk New College has been set up to help you achieve and is constantly investing in new projects to support you, our local community and residents.

We also have three other campuses. Suffolk Rural (based in Otley) specialises in everything from horses to horticulture. Our two Colleges On The Coast based in Leiston and Halesworth have a variety of course options for you to choose from.

2

OUR EXPERTS / STAFF

We pride ourselves in employing staff members who are incredibly passionate about the subjects that they teach.

Most have worked in the industry that they are teaching in. Current tutors include former learners, talented artists and we even have a world record holder on our books. Andrea Thompson is a multi-award winning record holder and former World's Strongest Woman.

All of our teachers and support team are united in caring and supporting you to ensure that everyone who studies with us becomes the best they can be.

3

OUR FACILITIES

We have four campuses based in Halesworth, Ipswich, Leiston and Otley.

Facilities include hairdressing studios, a restaurant called Chefs' Whites, a farm, construction workshops, a beauty salon, a sports centre and a theatre.

We also have film and radio production studios, a recording studio, study zones, chill out areas and all of our campuses have strong learner and welfare support for everyone who studies with us.

Future new build projects include a new health and social care hospital floor, a sustainable construction centre and the Suffolk Rural campus has just submitted plans to open a zoo.

WHY SUFFOLK NEW COLLEGE?

4

OUR COURSES

Our expanding course programme offers you the chance to study everything from art and design to animal studies, carpentry to computing, farming to floristry and sport to science.

In addition to our further education programme, we also teach leisure courses, T-Levels, commercial programmes for businesses & individuals and we also offer higher education options thanks to a long term partnership with the University of Suffolk.

Apprenticeships are an area that we also specialise in and they help hundreds of learners 'earn while they learn'. We also teach GCSE options in English and maths.

5

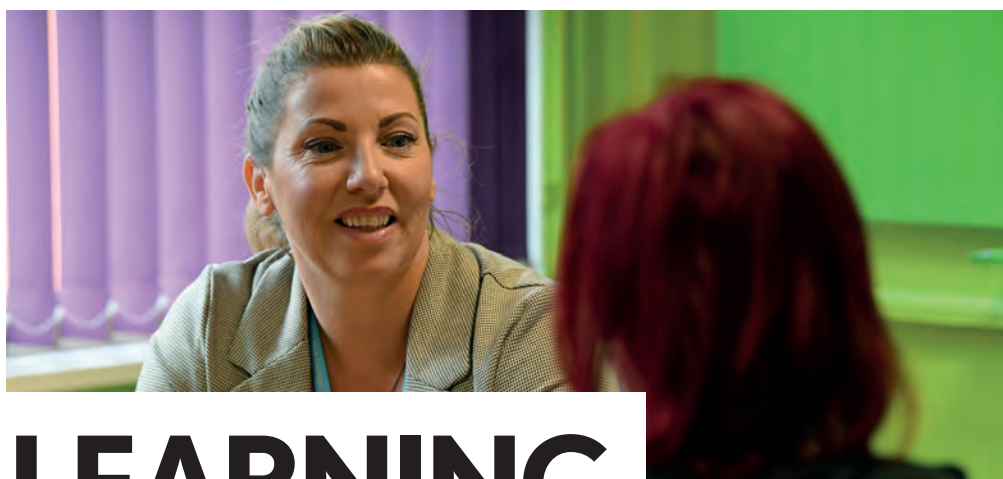

OUR SUPPORT

Our dedicated student services team are passionate about helping and supporting you.

They can offer information, advice and guidance in everything from assignment and exam tips, to creating a CV, applying to university or simply by supporting individuals with career and planning advice on their next steps.

They can also support you with advice about relationships, as well as your physical and mental health and well-being. Depending on your needs they also offer exam access assessments, arrangements and in-class support.

Our relaxed and responsive student support team will be with you throughout your time with us and they will ensure that your happiness, experience and well-being are at the heart of everything we do.

LEARNING SUPPORT & SEND

At Suffolk New College, we are passionate about equality of opportunity for all and actively encourage learners to tell us about any special educational needs and/or disabilities (SEND) as soon as possible, so that we can identify appropriate and timely interventions and support.

We can offer a range of support, depending on your needs, including:

- Support at interview
- Support with transition arrangements
- Personal care
- Mobility support
- Communication support
- Note taking
- Modification of learning materials
- Exam access arrangements (we can also undertake exam access assessments where appropriate, with some of our own staff appropriately qualified to do so)
- Provision of in-class support
- Annual review of your Education Health & Care Plan (EHCP), if you have one

We can also support you by making external referrals, including:

- Education and Health Care needs assessments
- Speech and Language Therapy
- Occupational Therapy
- AD support
- Social Care Needs assessments

If you have an Education Health and Care Plan (EHCP) please let us know. We can discuss your needs and any support that you have been receiving.

We may make contact with the local Council who maintain EHCP, so that we can better understand your support needs.

If you would like to find out more about how we can support you, please get in touch with our Additional Learning Support team: als@suffolk.ac.uk

CAREERS INFORMATION ADVICE AND GUIDANCE

Suffolk New College's CEIAG programme is based on the Gatsby Foundation's Good Careers Guidance benchmarks. These eight benchmarks illustrate what makes for the best careers guidance provision in schools and colleges.

All learners are able to access high quality CEIAG before applying for a course and during their time studying with us.

We ensure that learners are offered an accessible and stable careers programme where opportunities for advice and support are tailored to their needs.

At Suffolk New College, our teaching staff are industry experts and able to deliver advice and guidance relative to their industry and the employment pathways that can be followed. Across the College, learners can also access support with:

- Impartial information, advice and guidance
- CV writing
- Interview skills
- UCAS applications
- HE finance advice
- Job/applications support/advice
- Careers information (including access to in-house specialist careers advice)

As a College, we are very proud to hold the **matrix** standard for our information, advice and guidance services (IAG) across all of our campuses. (The **matrix** standard is the Department for Education's framework for making sure that those settings who provide advice and guidance, do so at a high level - and with integrity).

The College's most recent full review against the standard concluded: "Suffolk New College's accreditation review against the **matrix** standard showcased that high-quality IAG support permeates all aspects of the learner experience."

SAFEGUARDING & SUPPORT

Safeguarding young people and vulnerable adults is of paramount importance to us at the College, so that our learners can learn and progress in a safe and secure environment, safeguarding underpins everything we do.

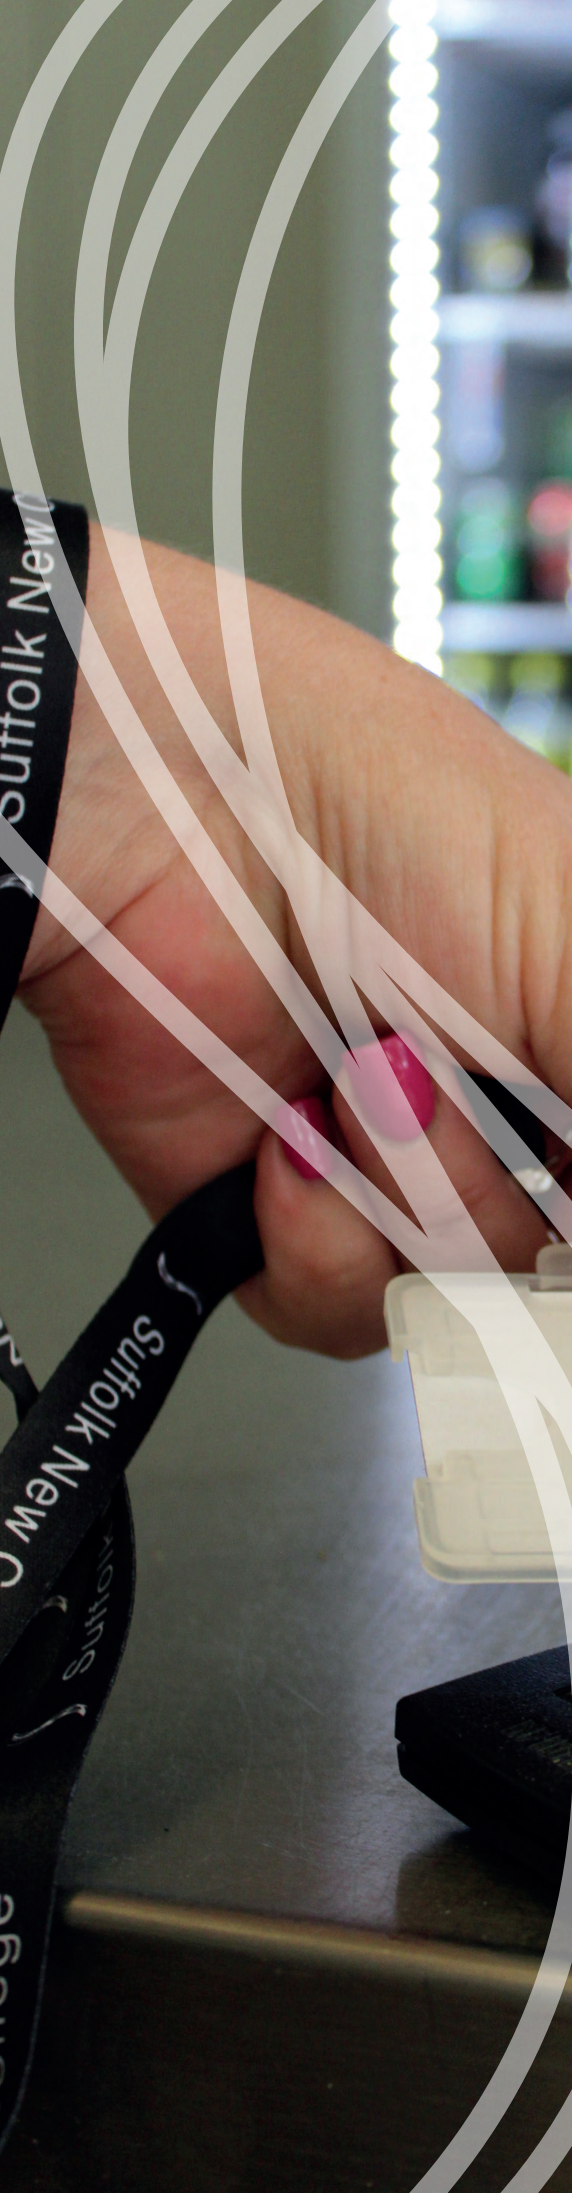

Young people have the right to make important decisions about their lives, however the College, whilst recognising this, also recognises its duty and responsibility to protect learners where there is cause for concern. This means that we will make contact with external support services, we may also contact parents / carers, as appropriate, depending on the individual circumstances, in line with our overall commitment to keeping learners safe.

In addition to supporting learners to stay safe (both in and outside of the College including online), other support for learners includes:

- Pastoral support
- Mental health and well-being
- Sexual health advice and guidance
- Housing and accommodation
- Finance and transport matters
- First aid
- Multi-faith chaplaincy
- Relationships, consent and domestic abuse
- Referrals / signposting to external services where appropriate for specialist advice

The Student Support team, working alongside other colleagues within the College, lead on awareness-raising campaigns throughout the academic year. These include for example, campaigns in support of national initiatives, such as World Mental Health Day (October) and Anti-Bullying Week (November). The team also help run much larger safeguarding campaigns in support of the College's commitment to ensuring that our learners feel safe to learn, in an environment where they can be themselves; free from judgement, abuse and discrimination. This year for example the team helped launch a campaign called 'It's Never Ok', in direct response to the 'Everyone's Invited' movement, to further raise awareness of peer-on-peer abuse, sexual harassment, violence and abuse.

Our commitment to you: Suffolk New College does not tolerate peer-on-peer abuse or any form of sexual harassment, violence or abuse (including online). Where incidents do occur, we will fully support learners and take appropriate action, as required, for any breaches to our policies and offence / harm caused to others.

BURSARY SCHEMES

We offer various bursary schemes that can help meet the additional costs of attending college depending on your eligibility, which might include:

- Contribution towards travel costs
- Uniform
- Kit and other equipment
- Trips
- Books
- Childcare (learners aged 20* & over)
- A four-weekly hardship payment that you can choose how you spend.

There are currently schemes covering:

- 16-18 Vulnerable Bursary
- 16-18 Discretionary Bursary
- 19+ Discretionary Bursary

These bursaries don't cover any tuition fees themselves, and they do have some eligibility criteria that you have to meet. Just apply to see if you are eligible as soon as you have started at college as the first round of applications is temporarily paused at October half term.

After enrolment you can log-on to a portal via www.suffolk.paymystudent.com/portal - fill in a simple form, upload your evidence using your camera phone to track the status of your application and view any letters you have received.

FREE COLLEGE MEALS

If you are under 19**, have applied for a bursary, and meet the eligibility criteria, we also offer an allowance for every day that you are timetabled to be in college.

This allowance will be automatically added to your college ID card if approved.

You can spend your allowance on whatever food or drink that you would like at the College food outlets.

* Age as of 31 August 2023

** Or up to age 25 as of 31 August 2023 with an Education Health and Care Plan, or EHCP.

WORK EXPERIENCE

You will be offered a variety of exciting work experience opportunities with us during your studies in order to help you prepare for the work place.

These experiences will give you valuable insights into the world of employment and help you prepare for a career in your chosen industry.

Most recently, we have seen learners set up a YouTube channel with Jimmy Doherty – the TV personality who worked with Jamie Oliver on the TV show called Friday Night Feast – and our performing arts learners worked with the choreographer of The opening Ceremony of the London

2012 Summer Olympics - and also got to perform at the National Theatre in London.

Sports learners worked with the local community on an anti-knife crime campaign, public services learners regularly link in with talks and visits to various bases relating to the armed forces and our culinary arts learners have worked with a variety of top chefs, including multi-Michelin star award winner, Daniel Clifford.

Many of these link ups can help put you in the shop window for a potential future job – and that is why as a college, we put so much value on work experience opportunities for you.

EMPLOYERS

At Suffolk New College, we pride ourselves on our links with employers. Every year at our annual awards ceremony, every single accolade is sponsored by a local or national business.

Our links with businesses consistently offer opportunities for you.

We've seen learners gain experiences at Ipswich Town Football Club and we are also looking at teaming up with a charity called Futurestars that will offer work placements for learners in Ghana.

Catering learners get to work with top chefs and many go on to work in award winning kitchens – such as the Unruly Pig near Woodbridge.

Music learners have worked backstage at Latitude and received advice from backstage crew who worked with The Killers and every single course area will benefit from guest lectures and businesses who are keen to help you make an impact in the world.

Apprenticeships

Apprenticeships offer a fantastic opportunity to people who want to combine work and training at the same time.

At Suffolk New College, we work with a number of different industries across Essex, Norfolk and Suffolk and occasionally further afield to ensure that our apprentices have an exceptional opportunity to learn on the job.

We have many successful established areas such as agriculture, business, administration, construction and motor vehicle and we are always looking to expand our apprenticeship programmes by working with new employers.

Our apprenticeship team will help and support you on to the career ladder and are available throughout the year to discuss your options and find the best programme for you.

You can find our latest apprenticeship vacancies on our website at www.suffolk.ac.uk/apprenticeships

TRAINEESHIPS

Our apprenticeship team are also able to develop bespoke traineeship programmes for businesses and learners. Please contact them today to find out more: business@suffolk.ac.uk

ENTRY REQUIREMENTS

Apprenticeships are available to anyone over the age of 16, living in England. There are different entry requirements depending on the sector and job.

APPRENTICESHIP LEVELS

There are various levels of apprenticeship you could apply for depending on your current skills and qualifications:

- Intermediate apprenticeship (level 2)
- Advanced apprenticeship (level 3)
- Higher and degree apprenticeships (level 4 or above).

SALARIES

The minimum wage for apprentices is £4.81 per hour, but many employers pay more than this. This is dependent on the sector, region and apprenticeship level e.g. some higher apprenticeships can pay as much as £300 - £500 per week.

HIGHER EDUCATION

The University of Suffolk is an agile, progressive university, responding to a changing world. It absorbs the best of UK university traditions and aligns them with a twenty first century audience, tailored to a modern world of employment and entrepreneurship.

It has established strong working relationships with business, research bodies and charitable organisations creating a rich network, enhancing initiatives and projects and growing its reputation for leading academic expertise.

The University of Suffolk is a significant contributor to local communities: developing subject areas in line to regional economic priorities and contributing to the overall economic growth of the county.

We are proud to work in partnership with the University of Suffolk giving learners the opportunity to join higher education programmes with us, validated by the University and leading to a University of Suffolk award.

COMMERCIAL SERVICES

CHEFS' WHITES

It cannot be underestimated what impact serving real customers has on a learner's confidence and skills, and so we welcome members of the public coming into Chefs' Whites. The restaurant is fully licensed and makes use of local produce.

chefswhites@suffolk.ac.uk
01473 382500

SPA & SALON FACILITIES

The College's hairdressing, barbers, beauty salons and fabulous spa facility are open to the public.

The industry-standard equipment and products our learners use supports their progression into professional salons.

Experience a first class service at a discounted price.

(Ipswich)	(Halesworth)

SPORTS CENTRE

Suffolk New College Sports Centre has fantastic facilities including a four court badminton sports hall and two multi-purpose rooms for public use.

With fully accessible facilities we offer various activities including badminton, basketball, volleyball and table-tennis with a dance studio and multi-purpose rooms to hire.

Currently we have fitness classes run at the centre including, martial arts groups, trampolining, children's karate and kick-boxing sessions.

sportscentre@suffolk.ac.uk
01473 219439

OUR LOCATIONS

Suffolk New College has four campuses offering a host of amazing facilities for you to learn, train and socialise in.

All have dedicated student service support teams on hand to offer advice, support and guidance throughout your time with us.

In addition to this support, you will get to work in custom built training areas that will enhance your learning experience.

IPSWICH CAMPUS

is situated just a short walk from the town centre and close to the picturesque waterfront and university.

This campus specialises in offering a wide variety of general further education courses and our facilities reflect this.

They include a theatre, TV film and radio production studios, a restaurant called Chefs' Whites, a beauty salon called The Zone, forensic crime scenes for those on science pathways, a Tech campus, chill out areas, relaxed study zones, a library, a sports centre, construction workshops and food outlets.

New sustainable construction and health science facilities are being created for those interested in those pathways.

SUFFOLK RURAL

is a large relaxed campus set amidst the rolling Suffolk countryside. The focus is very much based on land-based learning – although construction pathways are also taught here.

It's a heavenly haven for all lovers of the outdoors and many learners and staff comment on how it is a great place to work and study in terms of your well-being. The beautiful setting houses a farm, equine centre, greenhouses, gardens, an animal centre, an area for those on tree surgery pathways, a construction centre, library, student service support zone, foundation learning classrooms, cafés, study areas and a floristry workshop.

The farm has invested over £100,000 in the last 12 months meaning learners will get to work with up to date equipment with reference to tractors and combine harvesters.

IPSWICH CAMPUS

SUFFOLK RURAL

They also play a part in county shows, our lambing season and family fun days.

Animal learners get to work with a host of different species and horticultural learners get to work in the great outdoors as well as working in our two large greenhouses, where in the past, they have supported projects related to the Suffolk Show and Chelsea Flower Show.

ON THE COAST

based in Halesworth and Leiston in the heart of their respective towns. They are purpose built specialised skills centres with areas reflecting the courses we teach. In Leiston, facilities cater for games design and tourism courses, in Halesworth, we have kitchens, a hairdressing studio, a motor vehicle workshop, a reception area, construction facilities and study areas.

Whilst the different campuses have contrasting facilities, what unites them is they all have passionate and caring staff who all have industry experience and they are keen to share their life and career lessons with all of our learners, to enable you to progress to university, employment or an apprenticeship.

OTC - LEISTON

OTC - HALESWORTH

AGRICULTURE

TV shows such as Clarkson's Farm and Countryfile are doing a brilliant job of putting farming careers in the spotlight which is something that Suffolk Rural has been trying to do since opening in 1970.

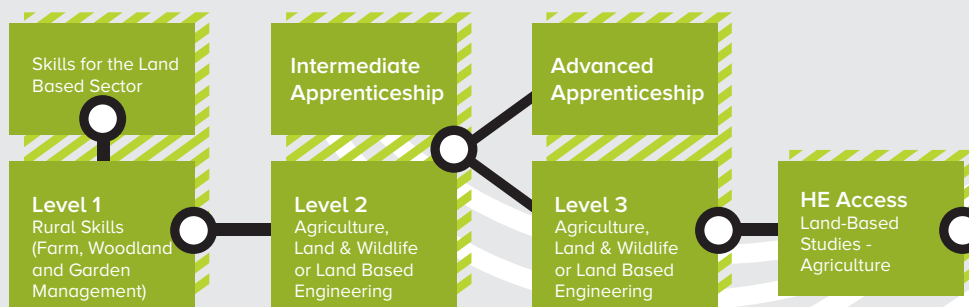

Around 20 years ago, numbers for those studying on agricultural courses were less than ten. Last year, over 50 learners trained at the College and those numbers are rising sharply.

The programmes are very hands on and investment in equipment and facilities is always strong so that learners can keep pace with the exciting technological changes that are consistently happening in this forward thinking industry.

Learners will get to drive combines and tractors and work with a variety of livestock including Red Poll cattle, sheep and goats, as they get a feel for all types of job roles and pathways that they can progress towards.

They will also get to compete in county shows and gain work experience opportunities with some of the colleges many partners such as Jimmy's Farm, whilst also gaining knowledge from a team who have all worked in industry.

Level two and level three (A-level equivalent) options are currently available for those seeking to study in a setting where the great outdoors is your classroom. We also offer a level one rural skills course for those looking to get their first steps towards a career in agriculture.

ANIMAL CARE

Learners will get to work with a variety of species throughout the year, working not just with our farm animals, but also learning about everything from tarantulas to tortoises and meerkats to mice.

We work with a number of industry partners throughout the year. Learners on our programmes have the opportunity to take part in multiple trips to organisations across the animal care sector.

We have just put in an application to become a zoo so this is a very exciting time to study on our extremely popular animal care pathways.

Learners take part in our family fun days where they get to share their love of animals with the general public.

Former learners include Harley McTiernan, who went on to a successful career

advising in Herpetology, a skill he brought back to us as a staff member. Harley is currently moving in to a full time zoo keeping role at Colchester Zoo.

Skills that will be gained on our level one to level three courses can lead to a variety of careers working in zoos, animal sanctuaries, in conservation, animal nutrition, physiotherapy, care or further study.

We are always looking to expand the range of animals that we care for at Suffolk Rural and we are proud to have links with a variety of partners including Jimmy's Farm near Ipswich.

Whilst you will be taught lots of theory, all learners will get to enjoy working in our custom built animal centre and on our farm.

ARBORICULTURE & FORESTRY

The sky is literally the limit for those seeking a career in arboriculture and Suffolk Rural has a long tradition of supporting people of all ages gain a variety of practical and theoretical skills in the subject of tree surgery and forestry.

The mix of learners ranges from those who have come straight from school to others who are seeking a career change.

Former learners include an ex stockbroker and many come to us in search of a career outdoors, having felt stifled working in and around an office environment.

The skills you will gain will allow your new office to be the great outdoors.

There are numerous career options depending on your interests and goals, which range from managing large forests to looking after and maintaining urban landscapes, national parks or public and private gardens.

The skills you pick up can enable you to set up your own business - or work for a major business.

There are level two and three options on offer. We also offer a Rural skills course at level one that will have elements of arboriculture.

So, if you have a head for heights and a passion for the outdoors, a career in arboriculture or forestry can help you rise to the top.

ART & DESIGN

Our art courses will encourage you to develop your portfolio, visit galleries and indulge your creativity.

Last year, our learners were involved in an art project with a cafe in Ipswich and we have many online and external opportunities for you to get your work seen by the general public.

We encourage work experiences at local galleries and offer design agency placements where possible on all of our courses that range from level one to level four. (We also have an access option for those looking to do a degree in this subject, having previously left school with little or no qualifications).

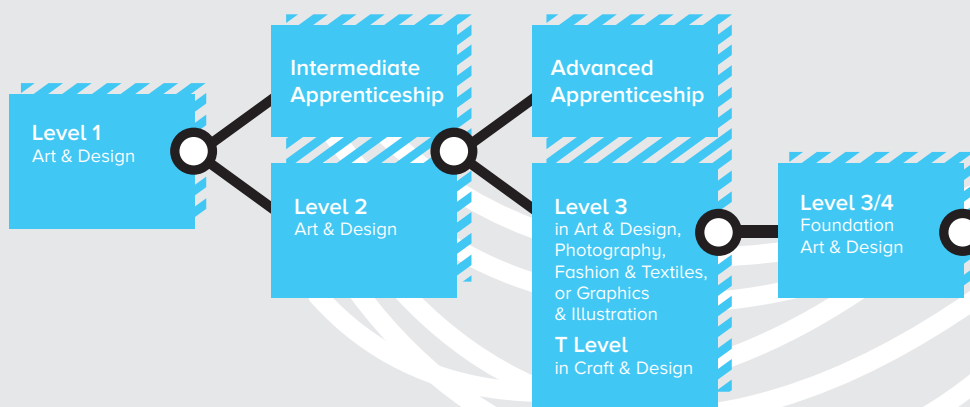

Some of this year's learners have gained a name for themselves by starting their own businesses. Alumni Harry Roper who set up his own clothing brand called Stupid Fish People.

Former learners include people like Kelly Anna who went on to be involved in design work for brands such as Nike and BMW, Kelly Anna has also gone on to have her prints worn by Beyoncé and Justin Timberlake.

Whilst studying with us, you will get to use your skills by experiencing a range of inspiring workshops throughout the year that will include 3D print, fashion & textiles, graphics and drawing.

The county itself has a rich history of artistic flair thanks to the likes of John Constable whose paintings sell for millions.

Whilst we can't guarantee that your work will sell for millions, we can guarantee that we will give you the skills and experiences that you need that will hopefully inspire budding Banksies and potential Picasso's to make a major impact in the art world.

AUTOMOTIVE

Those looking to put their careers in top gear by working in the motor trade can look to get in pole position by studying on one of our many automotive courses.

The programmes incorporate everything from agricultural engineering, motor vehicle, motorcycle maintenance, and vehicle accident repair.

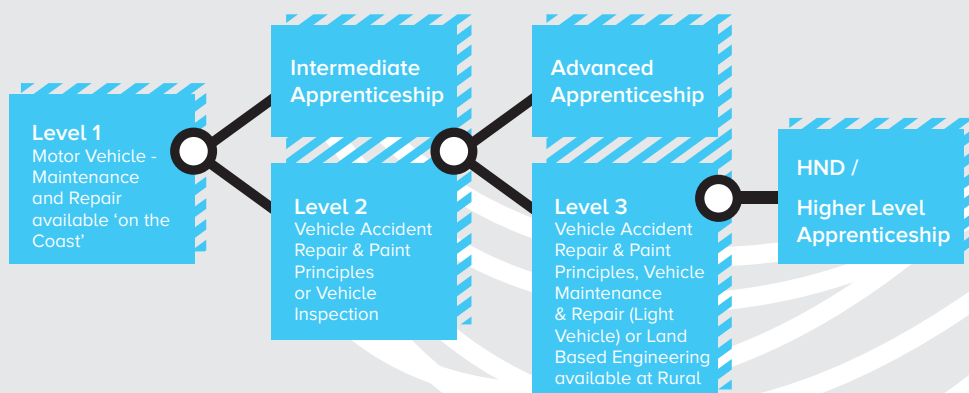

Course levels range from intermediary to level two and you have the chance to study these options in either Halesworth, Ipswich or Otley.

Learner projects have seen learners renovate motorcycles and a Jeep in a project with the Royal Air Force. They also let their creativity loose when painting a

marketing caravan with iconic images of Suffolk.

Industry links continually give learners direct routes into potential employment. Top performing learners also get the chance to represent the College and the region in skills competitions. This year, learner Logan Nicholls from Bungay got to the finals of an event called WorldSkills. If successful in the finals, Logan may get the chance to represent his country in an international competition.

If you want a career in the motor industry then don't sit in the passenger seat, switch the ignition on, put your foot on the accelerator and put your future in to pole position by studying with us.

BEAUTY THERAPY

The beauty industry is globally worth billions and is banking on talented and creative souls to learn treatments and techniques to pamper people from head to toe.

At Suffolk New College, not only will you receive the skills you need to be able to work in this creative industry, you will also get to offer treatments to members of the public at one of our salons either The Zone in Ipswich or Aura in Halesworth.

The courses available at Suffolk New College range from level one to level three. Specific make-up artistry options are also on offer for those looking to work in the entertainment industry.

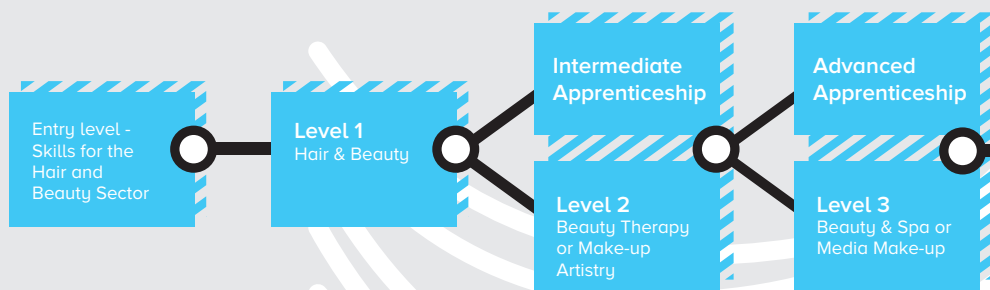

Former learner - Phoebe Walters - who recently worked with the singer Paloma

Faith - looking after the Brit award winning singers hair and make up for her most recent album.

Every year, learners get involved in internal hair and make-up competitions to perfect their talents in time-pressured environments.

In addition to all of this, beauty learners recently worked on a campaign where they were given advice on being able to spot signs of domestic abuse to support victims of these crimes as part of a campaign called Cut It Out.

All courses are taught by experts in their field who will share the knowledge and skills to enable you to find out everything from massages to manicures.

BRICKLAYING

The current housing boom and the ongoing lack of bricklayers in the UK means work opportunities will be plentiful if you work hard and complete a course at the College.

Programmes range from intermediate levels up to advanced where trained professionals will give you the tools you need to go on and work in the industry either as an apprentice or employee.

You will work in spacious workshops and learners get the chance to have sessions from those working in industry.

You will also get to work on community projects throughout the year. Over the past 12 months for example, a group was involved in a build project at the village hall in Grundisburgh.

There is also a chance for learners to take part in regional competitions at the Suffolk Show and national competitions such as WorldSkills. In fact at this year's Suffolk Show, Ryan Cook and Ryan Austin won an event by building a Jubilee themed wall in honour of her majesty.

The skills you will learn will stay with you for life and enable you to have a solid career that you can take anywhere in the world if you so choose.

BUSINESS

A highlight for one of our business learners this year was appearing in a BBC documentary relating to a former Suffolk New College learner who had successfully built a company from scratch that had gone on to turnover almost a million pounds in two years.

Jake Slinn – owner of JS Global - chatted to our year two learners and offered them advice about his career to date.

His visit is one of a number of external talks that our learners received to inspire them in their future careers.

Our level two or level three programmes aim to give you the skills to become the next Jake Slinn or Jay Z or Jeff Bezos.

Aside from external talks, you will study a range of techniques in the relaxed and professional surroundings of our Ipswich campus, gaining an all-round knowledge of the business world.

This year, learners organised an event that launched a new course, worked on charity projects and gained insights into subjects including finance, budgets, employment, marketing, publicity and promotions.

Ultimately, we want to give you the skills to make a massive difference in the business world – why shouldn't you be able to create the next Google?

In fact, the next time you Google 'next big UK business talent' – why shouldn't the answer be you?

Suffolk is home to one of the largest finance and insurance sectors in the UK outside London with hundreds of businesses offering a range of roles. Some companies in Ipswich employ over 1,000 people.

CARPENTRY & JOINERY

The ancient craft of carpentry can help you carve out new skills that will last a lifetime in an industry that is always searching for new talent.

Our level one to level three programmes and apprenticeships are taught in spacious workshops by industry professionals who want to guide you towards a rewarding career.

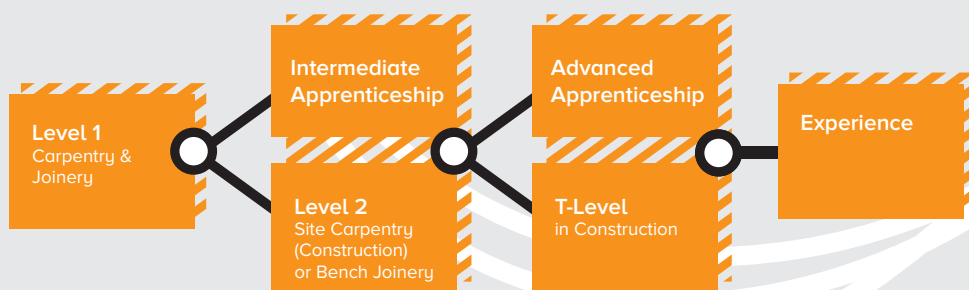

This year, our learners help work and complete a new build project at the village hall in Grundisburgh that saw one of our learners impress bosses so much that they got a work placement.

17 year old Ryan King played a part in this project. He said: "It's a big achievement for me to help the local community like this. It's something people will see for generations."

You will also get the chance to participate in regional and national skills competitions as well as gaining work experience opportunities via one of our many industry partners.

Some learners even gain awards with us like George Page who won carpenter of the year at the annual Suffolk Joint Consultative Committee annual dinner. On winning this award, George said; "The College have been supportive and helpful and I was overwhelmed to win this. I think winning the award will help me in the future to progress up the ranks."

So if the idea of a career in carpentry and joinery is chipping away at you in a good way, then don't down tools, pick them up and come and see us.

CATERING & HOSPITALITY

Situated in kitchens and classrooms in and around our newly opened and professionally run restaurant called Chefs' Whites, you will get a taste for life at the top of the hospitality industry by studying at our academy for culinary arts.

Led by our enigmatic director of service industries Mike Mulvihill and his team, their passion for food and service will rub off on you as you learn about this exciting industry.

Our restaurant hosts events and themed nights throughout the year and we pride ourselves on the many industry links we have gained over the years. Top local talents regularly come in and teach you what it takes to work in award winning global hotels and restaurants.

By studying with us you will get to perfect your talents in a range of culinary and

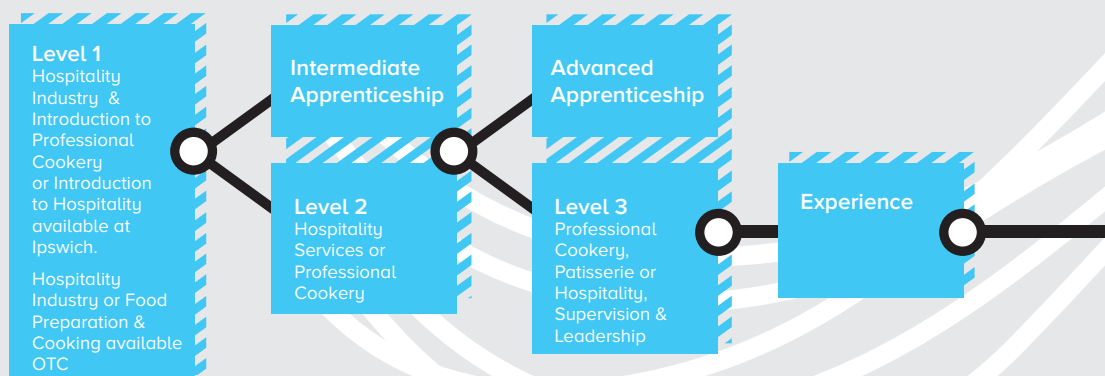

front of house disciplines.

This year, learners also made tea and cakes for the general public at the Suffolk Show, raising over £700 for charity - so you will also gain additional skills like this outside of the classroom.

Over at our kitchens in Halesworth, our learners hosted an afternoon tea to celebrate the Queen's Jubilee.

Ultimately, we want to help you progress and we have many learners who are now making a name for themselves in industry, working at The Ritz and Unruly Pig.

Course options range from level one to level three and they will help you cook up a storm as you try and make a name for yourself in an industry that is crying out for new talent.

CHILDCARE

Providing a platform for new generations to succeed and become decent, caring individuals who make a positive difference to society is something that we aim to instil in every person who studies with us.

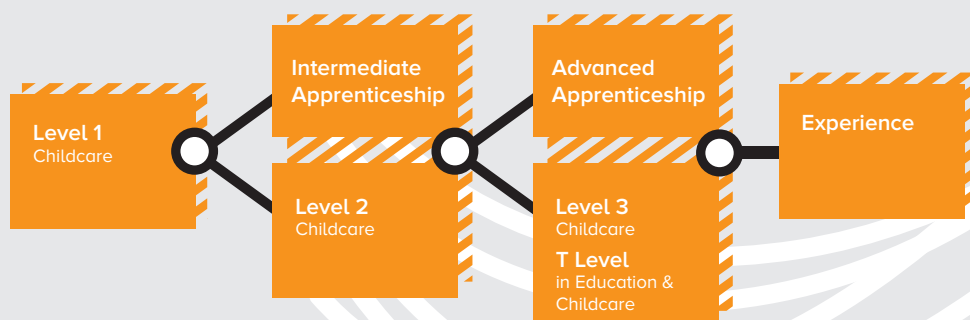

By studying on one of our childcare courses, you will be given the chance to learn the skills to help support and care for others as you help them make sense of the world.

You will regularly gain work experience opportunities and receive guest lectures from experts.

Learners also support charity campaigns and have traditionally raised money for Children in Need.

We have options from level one to five in terms of our childcare courses and we are proud of our ability to help our former learners gain employment in this rewarding industry.

During your course you'll study topics such as communication with children & adults, child development, children's health & well-being, providing safe environments for babies & children and play & learning.

CONSTRUCTION

16 years ago, Suffolk Rural opened a new state of the art construction centre that was created to combat a huge skills shortage in this sector.

Since then, we have gone on to train thousands of people who have continued to have successful careers in a range of different trades.

Today the industry is still in search of talented, hard-working and committed professionals to work in a variety of job roles in an industry that is going through a boom period.

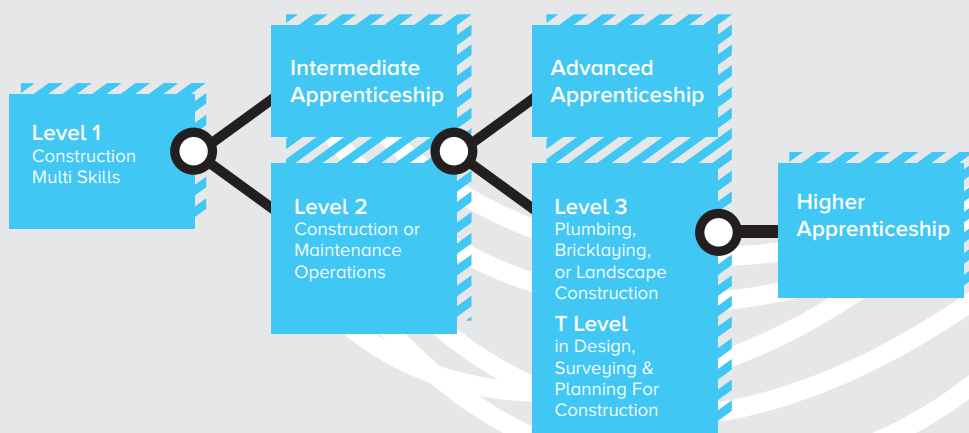

Our varied programme of construction qualifications extend from basic crafts through to technical and professional qualifications. Options currently include landscape construction, multi trades and site carpentry.

Tutors have all worked in industry and have a wealth of knowledge and experience that they are keen to pass on to learners and apprentices.

Top performing learners will also get the chance to represent the College at local, regional and national skills competitions.

This year, two of our learners won top prizes at the SJCC construction awards.

So if you want us to help you construct a career for yourself in this exciting and dynamic industry, we would love to help you get to where you want to go by building a solid career in this fantastic area of work.

ELECTRICAL INSTALLATION

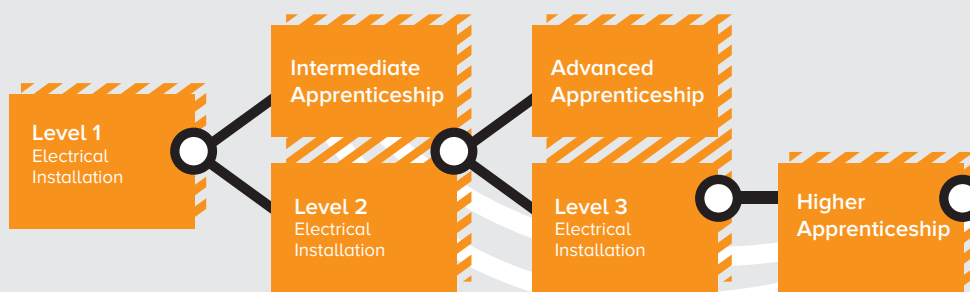

If a career as an electrician sparks an interest in you, then you will be buzzing to know that we have a variety of course options for you.

Our level one to level three programmes will enable you to light up the room with a set of skills that can take your career anywhere in the world.

If you show promise, you will get the chance to represent the College at skills competitions where alumni Zach Ward from Clacton got to the latter stages of an event called SPARKS.

In addition to competitions, learners will be given the chance to visit construction sites and businesses - and they will also get to see and work on community projects, whilst honing their skills at our industry standard workshops in Ipswich.

Electricians are well sought after and in terms of the UK and the rest of the world, the construction industry is keen to recruit hard-working skilled employees to help cope with a need to build more houses.

ENGINEERING

From the jet engine to the internet, UK engineers have consistently led the way in developing major technology that has had a lasting and positive impact on the way in which we live our lives.

It's a profession that constantly needs new people who are logical and creative problem solvers.

Every day is different in terms of the courses that we offer, they range from level one to level three in manufacturing and technology.

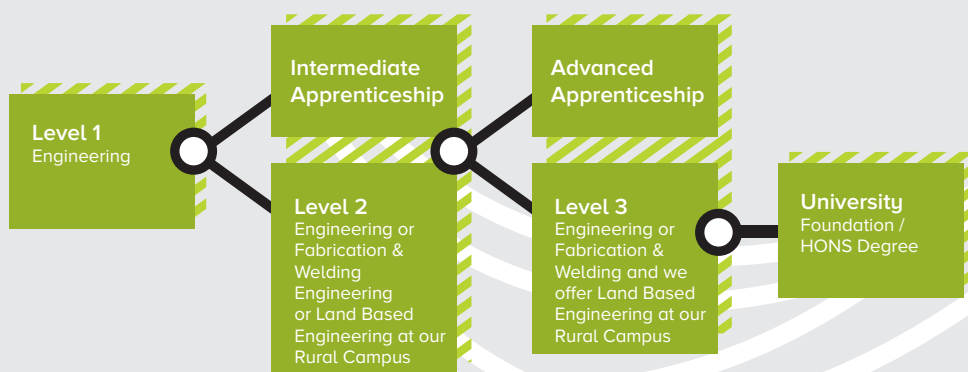

Civil engineering and welding options are also available and all courses are taught

by experts in their field, inside modern workshops.

Guest speakers are also invited into the College to talk to learners about the work that they do so that they can inspire you to realise your potential.

This industry incorporates everything from the glamour of Formula One to super ships, space travel, huge planes and an amazing history.

Therefore, if you would like us to help you engineer a brighter future, please get in touch.

EQUINE STUDIES

If you're looking for a career that will see you charging down the final furlong in first place then jump to it and check out the course options we have at Suffolk Rural for horse related courses.

You will get to train and work in our amazing equine centre that has an indoor and outdoor arena, coached by expert lecturers who have passion and professional experience that they are keen to share with others.

We offer a series of programmes working with a variety of different breeds thanks to a livery service that we offer.

The College is situated around 40 miles from Newmarket and our learners get to meet trainers and visit the home of horse-racing during their programmes, to get a greater understanding of the careers that are available to them in the future.

You will also get the chance to see top show-jumpers in action as our learners help build and construct courses in the grand ring at the Suffolk Show.

Opportunities to work on the yard are also possible for hard working and committed learners.

HEALTH & SOCIAL CARE

Health and social care careers took centre stage thanks to the amazing support they offered the public during the dark days of Covid as everyday people became championed as heroes - and rightly so.

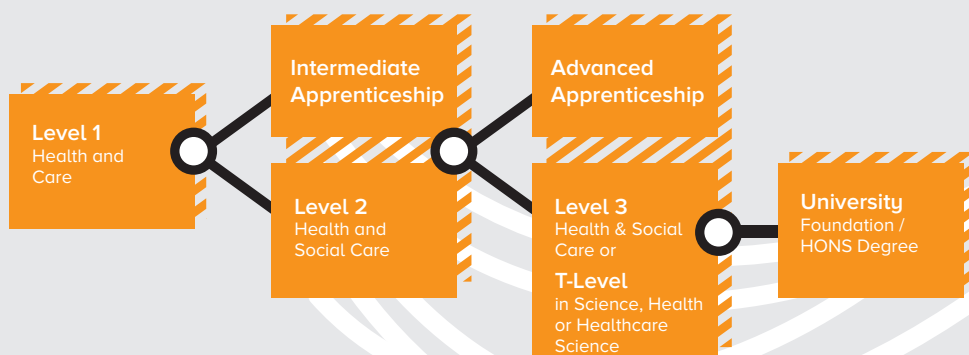

Our new health and care centre will have a mock hospital ward that will help you get a complete hands on insight into working in this environment.

Partly due to this, the number of those wanting to work in these sectors has dramatically risen - and that is why we will be investing heavily in a four story complex dedicated to teaching you the skills you need to go on and become a healthcare hero yourself.

On our level one to level three options, you will learn a host of new skills in various subjects including health and well-being, social care, effective communication carer, equality and diversity, human lifespan development and health lifestyles.

You will work with skilled practitioners who have had careers in the past and in previous years, learners on these courses have worked with and raised money for a variety of charity campaigns.

This year for example, the College has been in talks with an organisation called Futurestars that aims to offer work placements for learners on this programme in Africa.

HORTICULTURE

It's been a glorious year for our horticulture team. They got a double gold medal for their garden design at the Suffolk Show.

They were featured on the television for creating a user-friendly garden for a couple in Felixstowe in a BBC DIY SOS style building project.

A learner was chosen to go to the Chelsea Flower Show as part of a campaign to promote careers in this field to other young people and plans are underway to create a memorial garden for a local hospital next year.

Taught by industry professionals who have extensive contact books and impeccable knowledge, these courses have grown in stature in recent years.

Our level two and three options - many supported by the Royal Horticultural Society, will give you the skills required to work in industry. In fact many learners mix work with study and some of this year's crop have set up their own business before finishing their course.

INCLUSIVE LEARNING

We offer personalised programmes that will help you prepare for work or volunteering, as well as independent living.

We will provide you with real opportunities to learn and develop and you will get the chance to study in an incredibly friendly and caring environment.

Our four pathways help you move through college onto your final destination.

On both our Route to Adulthood and Route to Independence & Volunteering pathways, you will learn independent living skills, managing money, and looking after yourself.

These routes incorporate lots of community outings and activities, as well as raising money for charity or supporting local and

national events, such as Children in Need, or Comic relief.

The Route to Employment pathway gives you an introduction to college, and then supports you to learn employability skills and through work placements such as a supported internship.

On our Route to College pathway you will get to experience college life through a varied timetable of hands on taster sessions, so you can explore everything the College has to offer and make decisions about what you would like to study vocationally or academically in your second year.

Whatever your aspirations may be, our programmes will help you develop your confidence, increase your skills and knowledge and help you progress.

Careers in information technology are more important now than they have ever been.

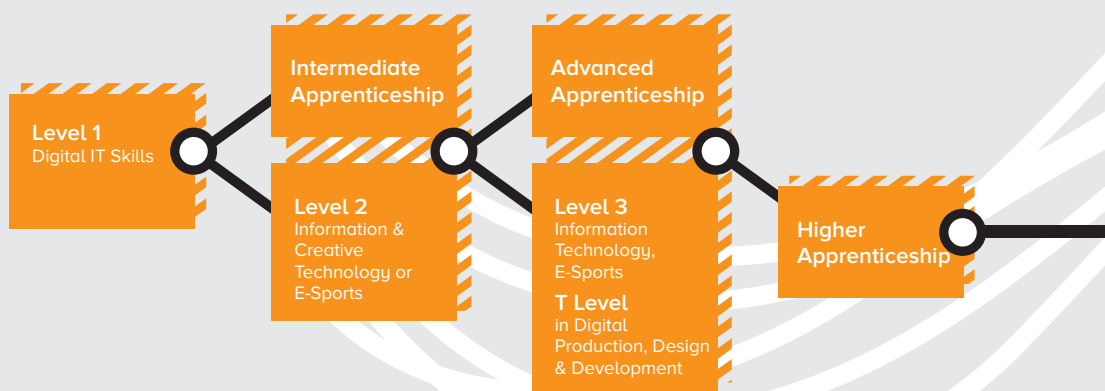

The Super heroes of software and hardware- from managing data, spreadsheets and analytics to looking after global security warding off cybercrime, jobs and roles are plentiful if you get the right skills at the right time.

That is why we have invested heavily by creating a £2.4m Tech campus that has all the latest kit and technology that you will need to become part of the new IT crowd.

A growing part of the FE league, analysing game play and app development are key areas of the course and relevant to real work experiences.

Digitally dive deeper into mobalytics, web design and business support systems and learn how to simultaneously keep your head above water learning the impact and importance of positive nutrition, health and well-being.

We offer courses ranging from level one to level three and subjects that you will look to cover will include everything from social media to start ups and security.

LAND BASED ENGINEERING

The College has a designated space for training land based engineering courses at our Suffolk Rural campus. We also have our own on site farm for you to work within.

We have recently purchased a combine harvester and we are confident that proposed partnerships with major manufacturing firms will give us more modern technology to teach these programmes throughout the year.

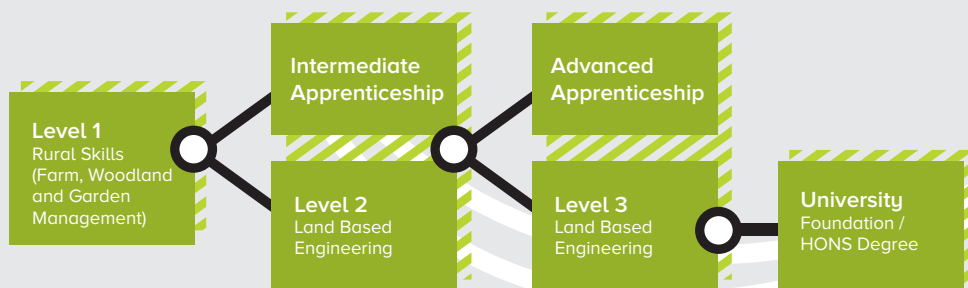

Not only will you get to learn and work with high technology, you will also find out about GPS, robotics, climate change and the environment as well as getting scientific insights into the world of farming as a whole.

There is a real shortage of agricultural engineers across the board, so by working with industry via guest lectures and site visits we will be training you to become the local and national talent that is needed to fill a variety of roles.

You will need to be 16 or over to study on this course and although you may not have previous experience, a desire and interest in this subject is a must.

Suffolk Rural was set up over 50 years ago to help teach and train the next generation of agricultural experts.

So, you will be in good hands and be taught by talented professionals in their field who will be keen to help you positively plough a legacy in this oldest of professions if you choose to study with us.

MEDIA

If you think YouTubers rule the world, then we will teach you the skills you need to become the next big internet sensation on one of our media courses.

The courses help teach the next generation of writers, journalists, TV presenters, podcasters, directors and influencers - new skills that can help you go on and make a name for yourself in the creative world of media.

We have industry experts who teach level one to level three course options and our

facilities include a radio broadcasting studio, a film theatre and a green screen TV studio.

Most recently learners got to work on creating a YouTube channel for the TV star Jimmy Doherty this year - so hands on experience on real life projects are a key ingredient on your course.

Whilst the media world is highly competitive, we will give you the confidence to progress into university or employment with the tenacity of Tom Cruise in Top Gun 2.

MUSIC PERFORMANCE & PRODUCTION

Former Suffolk New College learners include Barns Courtney, whose mixture of blues, rock and folk have seen him go down a storm in the USA. Another former learner Samantha Harvey who has had millions of hits on YouTube thanks to her talent for song writing - as well as her ability to cover songs.

In recent years, learners have been given a backstage pass to get a feel for life behind the scenes at a gig involving The Killers and they also got to work at the Latitude Festival.

Suffolk's own Ed Sheeran and the drummer from Ipswich Nandi Bushell who has worked with Dave Grohl from the Foo Fighters have proved that you can come from this region and make a name for

yourself in a global context. So we can't wait to give you the skills you need to create your own music, collaborate with your fellow learners and form a band - or learn all about making and mixing music as well as putting on gigs if your prefer a career behind the stage as opposed to being on it.

We have our own music studio at our Ipswich campus and local artists regularly come in to offer advice and guidance to make it in this competitive industry.

On our level three programme you will also learn about the varied career paths and history of music.

Learners also get the opportunity to perform at various awards events and corporate occasions.

PAINTING & DECORATING

Frustrated artists who are keen to paint the town red can look to decorate their bank balances with cash via a career in painting and decorating.

If you have desire and the talent to put the finishing touches to the many properties that are being built in the UK because of a property boom, then we will give you the skills to start a career that could also see you work abroad.

You will be taught by industry experts who will have contacts to create site visits that can help you build contacts before you finish your course.

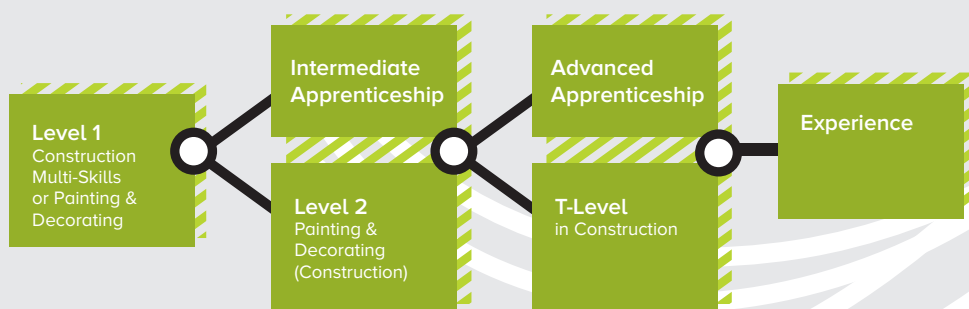

You will also get the chance to take part in community projects and learners get the opportunity to compete in skills competitions against other colleges.

Techniques you pick up will include the ability to apply oil based, eggshell and emulsion paints by a brush and roller.

You will also look at wall and ceiling coverings, decorative finishes by rag rolling, sponging and stencilling.

You will work in our state of the art and fully equipped workshops - and you will also be able to use our new Net Zero construction campus.

The truth is, there is always a real need for good painters and decorators, so if you work hard and you are able to show your creative flair and dedication to your craft, the world is literally your canvas.

PERFORMING ARTS

Most actors dream of performing in front of full houses at iconic theatres in London at some point during their careers.

Our learners were lucky enough to achieve that goal during their time with us when they appeared at the National Theatre and performed a new play called 'You Don't Need to Make a Big Song and Dance out of it' in June 2022.

In addition to this, learners performed in a number of plays and musicals throughout the year including Legally Blonde and some learners were involved in creating a Christmas good-will song for local primary schools in the region.

They also had an all-day dance workshop with Claira Vaughan who choreographed the London 2012 opening ceremony and

in previous years, learners have had sessions with West End star Ruthie Henshall and been on a study trip to Barcelona.

Our level one to three course options are focussed heavily on helping you to perfect your craft and grow in confidence so that you can go on and make an impact in this competitive yet rewarding industry.

You will get to learn about acting techniques, singing styles, TV, film, stage management, theatre history and dance where you will work in one of our two in-house studios.

Learners also get a taste for the limelight by taking part in radio and newspaper interviews to help promote future productions.

PLUMBING

Not a lot of people know that Michael Caine is a former plumber and MMA champ Conor McGregor also started out as a plumber.

So if - like them, your pipe dream is to become a plumber then our level one to level three course options will give you the skills you need to learn a trade that pays well.

With average salaries around £32k according to www.reed.co.uk the rewards are there for you if you get the skills and qualifications you need.

The College has invested well in plumbing facilities so you will get the chance to

work in industry standard workshops alongside passionate lecturers who have all made a name for themselves in industry.

Whilst with us, you will get a full overview of the plumbing and heating industry.

And once you get the sought after skills needed, you will be able to work anywhere in the world.

The need for new talent coming into industry is as big as it's ever been - so now is a great time to become flush with success by starting your plumbing journey with us.

PUBLIC SERVICES

To the left and quick march towards a career in public services by studying on one of our courses. Learners gain a host of skills throughout the year to gain the knowledge required to sign up and support everything from the fire service to the forces.

Reflecting on the last 12 months, learners took part in Remembrance Day commemorations, organising a poignant ceremony at the College, they went on an army leadership course, got involved in a community tree planting project and played a part in a Queen's Jubilee parade at the Suffolk Show.

In previous year's they chatted to the Assistant Chief of Suffolk Police about his life in the Met and his thoughts on the TV show Line of Duty – and they got to hear from a real life bodyguard who had looked after former Prime Minister, John Major.

Taught by former public servants, our courses will give you the background, knowledge, commitment and ideologies to make a real difference to people's lives in the future, by working in this rewarding industry.

SCIENCE

We teach a number of science courses and thanks to TV shows like CSI, Line of Duty and Dexter, course numbers for those studying forensic science have dramatically risen in the last few years.

Our lecturers are passionate about making science relevant to their learners and they have a history and background of working in this industry.

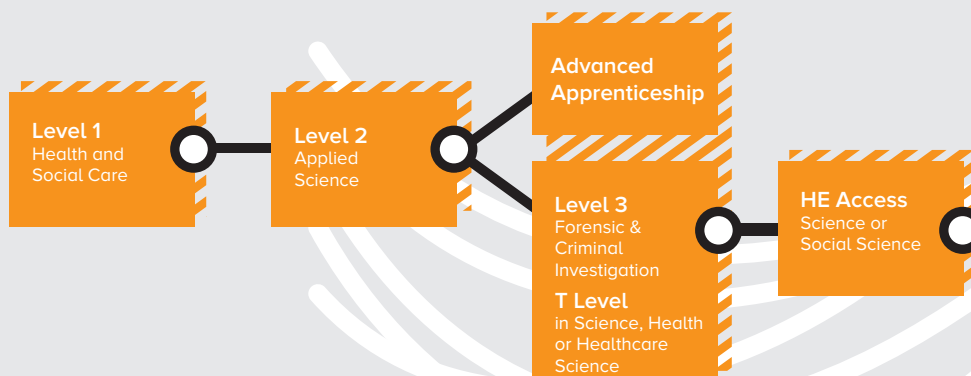

Learners have taken part in a national skills challenge where they were given crime science scenarios to review in a time-pressured environment.

We have also recently invested in new equipment for our classrooms - including crime scene areas.

In terms of the courses, some study with us to help their ambitions of entering the health service via our access to higher education scheme. Others study at level two or three because they are interested in forensic and (or) criminal science.

External company and industry visits will take place as you get the chance to pick up the skills you need to progress.

Looking at the big picture, science is currently suffering from a massive skills shortage, so for those who show determination, talent, hard work and passion, the potential for employment is extremely positive.

SPORT

Learners have had sessions with international manager Ben Pugn from the Cayman Islands and got the chance to grill Newcastle United's goalkeeper Nick Pope. They've been taught by former premier league players Titus Bramble and Jason Dozzell.

Learners also got to meet the head of media at Chelsea Football Club this year to get a peak behind the curtain of one of the biggest teams in the world.

We are always looking at links with external organisations and we have teamed up with Futurestars in a project that will give you the opportunity of travelling to Africa next year.

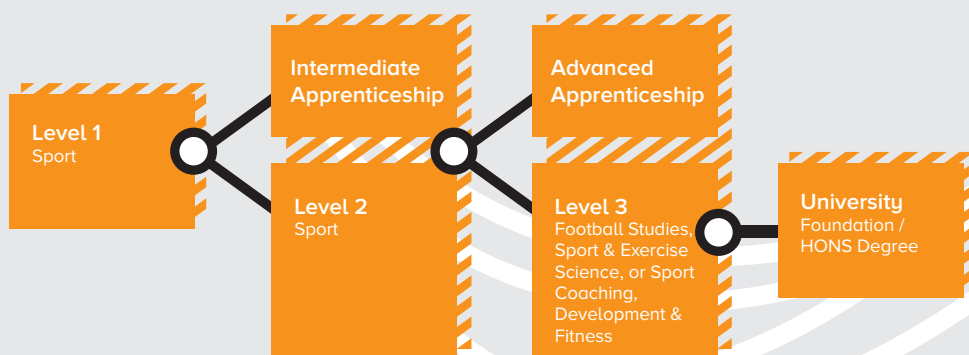

Placement opportunities for all learners include; Premier Education, Ipswich Borough Council's leisure facilities, Suffolk School Games, and ITFC academy.

We have agreements and partnerships with UoS, Lincoln Uni, and UCFB Wembley Uni, supporting progression for learners.

Facilities include a sports centre that is on campus and we are excited to open the doors on our brand new gym this 2022. Trips to local and national sporting arenas also form part of the course.

Taught by industry professionals, awarded with a commendation for BTEC teaching, you will get the chance to look at many sports industries as well as getting inside the psychology and science of sport. Modules include lifestyle, performance and well-being.

If a life and career in sport excites you as much as the chance of appearing in a World Cup, then shoot for the moon and get in touch.

T-LEVELS

We were one of the first colleges in the UK to teach T-Levels. The first group studied on a design, surveying and planning pathway.

As part of a T-Level, you have to gain work experience, in previous years our learners got the chance to work on a project at Jimmy's Farm and take part in an environmental conference with Greater Anglia.

Learners have also been invited to Westminster to meet big hitting politicians to help shape these qualifications for others.

T-Levels have been described as the 'Gold Standard' of technical education and they are gaining in popularity.

Whilst initially we just taught design, surveying and planning, we now offer courses in accounting, childcare, healthcare, digital production & design, healthcare and management.

All courses include a 45-day external placement and aim to help you learn about a subject that combines academic and hands-on content, with work experience and digital skills.

You can expect to participate in a high quality course that has been shaped by employers so that you will be fully prepared for your future.

WHAT NEXT?

1. APPLY ONLINE

www.suffolk.ac.uk

Simply head to your chosen course on our website, hit 'Apply', then follow our simple application process. Alternatively, call 01473 382200 or email info@suffolk.ac.uk to request a paper application.

2. CHECK YOUR INBOX

Once an application has been sent, you will receive confirmation that we have received it, with information on your next steps. Make sure you give us the correct email address!

3. COME AND VISIT

Details of your experience days and enrolment dates will be sent to you in plenty of time. Experience days are usually late June, enrolment starts from GCSE results day, and term starts in September, so don't book any holidays then!

Cover design by Daniel Calver aged 13, on work experience from Stowmarket High School.

The information in this prospectus relates primarily to the session 2023/2024. Although it is correct at the time of going to print, September 2022, amendments may be made from time to time without notice in relation to individual programmes and the facilities or services available from or provided by the College. The College, therefore, reserves the right to withdraw, suspend temporarily or change programmes or facilities identified in this prospectus and cannot accept legal or financial liability arising as a result.

Important notice: All students will be required, as a condition of enrolment, to abide by, and submit to, the College's regulations and procedures as amended from time to time. Details of the current regulations and procedures are available on request, from info@suffolk.ac.uk.
